

CAR SHARING

Preston and District u3a recommends the following policy when members car share.

Calculate the total journey mileage and multiply this by 30p per mile to give the total journey cost.

Divide this by the number of people in the car including the driver.

EXAMPLE:

A return journey of 60 miles with 4 people in a car.

$$60 \times 30p = \text{£}18.00$$

Divided by 4 = £4.50 per head.

Adopting this policy ensures a consistent approach when volunteer drivers use their own vehicles when taking other members to venues.
